

From Mapping your Supply Chain to Assessing Your Impact!

Overview

In an interactive session, the audience will learn practical ways to not only map your supply chain but to understand the direct and indirect risks and impact in the supply chain and deal with them in the most effective way. This session will explore risks of trading with countries, with along with social and environmental risks in the supply chain.

Speakers:

Moderator: **Veronica Rubio**, BSCI Senior Strategic Issues Manager – FTA

- **Norma Snell**, BSCI Dutch Representative – Noble Achievers
- **Lorenz Berzau**, Managing Director – Cocomply BVBA SPRL

Session Highlights

- Easy explanation of due diligence: doing your homework properly by knowing your product, where it comes from, who has made it and by mapping your supply chain
- Supply chain mapping and risk mapping are crucial and go hand in hand
- Use of fake cases in the session to evaluate and connect audit rating with related risk
- Companies should manage expectations of improving performance
- Sub-contracting is not necessarily bad as long as the supply chain gets managed
- Sub-contracting risk should be visible before the social audit
- Supply chain risks should be made open and be shared in order to be managed
- Auditing is not a guarantee
- Try to align your solution with the behaviour of the one you like to change (supplier)

Quotes

- Norma Snell: 'If you want to have a sustainable company, there are some actions which have to be taken'
- Norma Snell: 'Use that peer pressure of more than 1800 members to engage with them and RSP holders'
- Norma Snell: 'Give your business partners the feeling you are generally interested'
